

## Evaluation Report of SSC

A meeting of the Evaluation Committee for Registration/Selection of Supply & Services Companies (SSCs) under the Project titled "*Water Conservation and Productivity Enhancement through High Efficiency Irrigation Systems*" was held on 15<sup>th</sup> December, 2007 in the committee room of Federal Water Management Cell under the Chairmanship of the Project Director (FPMU) HEIS Project, for scrutinizing of Bidding Documents of SSCs. The list of participants is annexed.

2. The Chair welcomed the participants and briefed about agenda items of meeting. After discussions the following suggestions and decisions were taken:

### **Suggestions and Decisions:**

- I. The Committee argued that having huge project targets it would not be possible for few big firms to complete the targets well in time. All members of the Committee were of the view that more firms should be given chance to meet the project targets. The Committee suggested that flexible approach may be adopted for evaluation of Services and Supply Companies, (SSCs). The Committee further suggested during the first year of the project major target is to install demonstration plots wherein SSCs have to share 10% of the total cost which is a good indicator to judge the performance of any of the firms therefore new and small firms having little experience may also be given chance to show their capabilities. It was also suggested that the companies that could not participate and are capable, the door may be opened for them for registration during next year.
- II. It was decided by the committee that three categories of the SSCs may be formed as given below:

<b><u>S.No.</u></b>	<b><u>Class</u></b>	<b><u>Marks</u></b>	<b><u>Remarks</u></b>
I.	A	Greater or equal to 60%	Selection for one year Conditional Selection for three months.
II.	B	40% to 50%	Firm will complete shortfalls during the probation period.
III.	C	Less than 40%	Relaxation for Six months to complete the shortfall and apply again.
